

Task 1

Draw a simple bar model like the one in the PowerPoint.
Count out the starting number into the total bar using any objects you have to hand, such as pasta, toy cars, large beads etc.
Share fairly between the 2 parts to find half of each number.

Half of 12 is

Half of 16 is

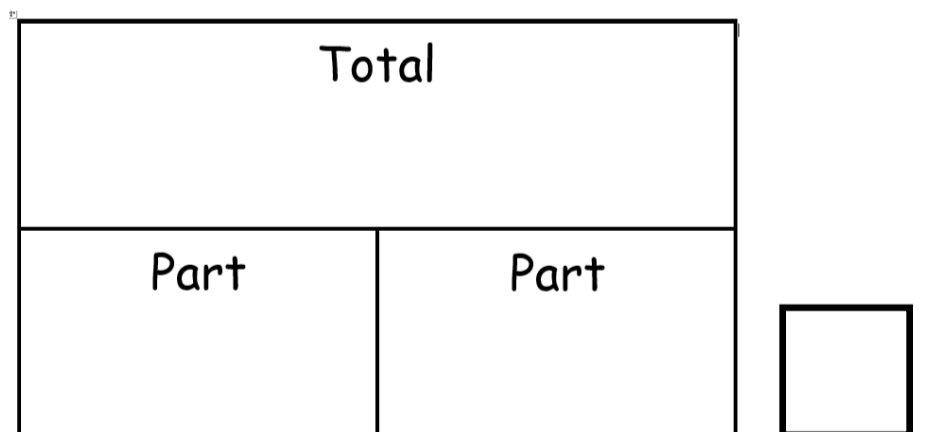

Half of 4 is

Half of 20 is

Task 2

Can you count whilst you share the number fairly?

There are 10 flowers. Half of the flowers are picked. How many flowers are picked?

There are 14 children. Half of the children go on the field. How many children go on the field?
