## <u>Year 4 – Measure – Ordering Millilitres and Litres</u>

## Remember...

- If all of the weights are in the same unit of measure, compare them by looking at the size of the largest value first (digit furthest to the left)
- If the weights are not in the same unit of measure, convert the millilitres into litres or the litres into millilitres so that both numbers are in the same unit of measure.

Order the numbers below from smallest to largest:

1.

23 ml	6 ml	506 ml	370 ml	800 ml	58 ml		
2.							
7.5	8	0.8	0.003 I	0.06	4		
3.							
200 ml	2	250 ml	800 ml	3	2500 ml		
4.							
2	987 ml	31 ml	35 ml	3	30 ml		
5.							
5	600 ml	3	569ml	6 I	567 ml
