

Year 4 – Measure - Converting Millilitres and Litres

Remember...

1000 ml is equal to (or the same as) 1l.

Millilitres in to litres = Divide by 1000

Litres in to millilitres = Multiply by 1000

Convert these masses into the unit of measure given.

1

a) 4 ml = _____ l

b) 37 ml = _____ l

c) 140 ml = _____ l

d) 565 ml = _____ l

e) 3000 ml = _____ l

f) 4030 ml = _____ l

g) 6 l = _____ ml

h) 4.6 l = _____ ml

i) 2.36 l = _____ ml

j) 0.8 l = _____ ml

k) 9.75 l = _____ ml

2.

a) Mr. Morgan wanted to convert 2.57 litres of juice into millilitres. How much millilitres would this be?

b) Mr Douglas wanted to convert 982 millilitres of milk into litres. How much milk did he have?
