

E-Safety

Top tips while at home...

1. **KEEP SAFE** by being careful not to give out any personal information like your full name, home address, photos or school name.
2. **NEVER MEET** someone you have been speaking to online, especially if you do not know them.
3. **DO NOT ACCEPT** emails, messages or open files/ photos from people you do not know - you can't trust them and they might have nasty messages in them or lead to viruses.
4. Information you find on the internet may not be **RELIABLE**. Also, some people could lie about who they are.
5. **TELL** a parent or career if something or someone makes you feel uncomfortable or worried. You **WILL NOT** be in trouble for this!
